EXPERIENCE

Associate Software Engineer · Techfy (Remote)

Dec 2024 – Present

- Built and shipped features across two live B2B SaaS products — Floww (social media automation) and Click2Deploy (cloud deployment) — serving real paying customers.
- Integrated the Meta Graph API for Instagram & Facebook automation: DM triggers, comment replies, story mentions, and webhook deduplication via canonical ID matching.
- Implemented Stripe subscriptions, billing webhooks, and plan upgrade flows; fixed a production planId sync bug in Click2Deploy.
- Built a React Flow visual automation builder with dynamic edge management, orphaned-node pruning, and PostgreSQL cascade deletes.
- Resolved critical production bugs: localStorage cross-tab contamination across 51 files, prefetch-on-boot latency architecture, and Facebook/Instagram DM deduplication.
- Integrated Claude and OpenAI-compatible APIs to build agentic workflows, automation triggers, and AI-powered features in NestJS.
